ASSEMBLY

STEP 3.

Attach Right Leg (P5) and Left Leg (P4) to the End Panel (P6) using hardware parts (H3) and (H5). Now attach the two Side Braces (P7) to the legs and end panels as shown below in FIG 3.1. Once the legs, end panels and side braces are assembled, attach them to the table assembly using hardware parts (H1) and (H2) also shown below in FIG 3.1. Attach the Leg Levelers (P9) to each of the four legs before turning the table over.

IMPORTANT!

Remember, your table is up-side-down. The left leg will be on your right and vice-versa while up-side-down.

STEP 4.

When the table is complete and in it's final location, we suggest that you make sure the table is level. Please refer to the instructions for leveling a pool table on the following page.

INSTRUCTIONS FOR LEVELING A POOL TABLE

- Assemble pool table according to the instructions, making sure levelers are screwed in completely, then turning one full turn out.
- Any type of level would be sufficient to perform this procedure. However, a two-foot level is recommended.
- Before leveling, make sure level is placed on the playing surface, not the rails.
- Level the ends between the corner pockets. Place the level on the playing surface between the two corner pockets and adjust the levelers in or out to position the bubble in the middle of the level.
- Repeat the step above to the opposite corner pockets.
- Next, level the length of the table. Place the level next to the side pocket and adjust the levelers in or out to position the bubble in the middle of the level.
- Repeat the step above to the opposite length of the table.
- Recheck both short ends to ensure bubble is in the middle on the level.
- Depending on the surface the pool table sits, especially deep pile carpeting, the pool table needs to settle for 24 hours. Recheck the level on each side of the table after 24 hours.
- These same instructions may be followed to level hockey and soccer table play surfaces as well.
